ARGUMENTS
FOR ADVERTISING
MATCHES

- High contact frequency** – each single match is a recurrent eye contact for your advertising message.
- Optimal design potential** – by offset printing and additional options of finishing, by hot foil printing or partial uv lac and embossing.
- Widespread distribution** due to low price per piece.
- No losses in spread** due to distribution directly into the desired target group.
- Long-lasting effect** – nobody destroys the box or book until the last match hasn't been used.
- High utility value** – because of permanent need of lights for candles, fireplace, grill, oven, cigarettes, cigars, pipes...
- Interesting for non smoker as well**, because 95% of all smokers use a lighter.
- High sentimental value** compared to ads, tv or radio spots.
- Large range of distribution areas** – e.g. hotels, restaurants, taxi, fairs, promotion, mailings, sales staff.
- Environmentally friendly**, because all components can be recycled and are biodegradable.
